Agenda

Global Perspective

- ❖ Global Occurrence
- ❖ Regulatory Approaches

Treatment Concepts

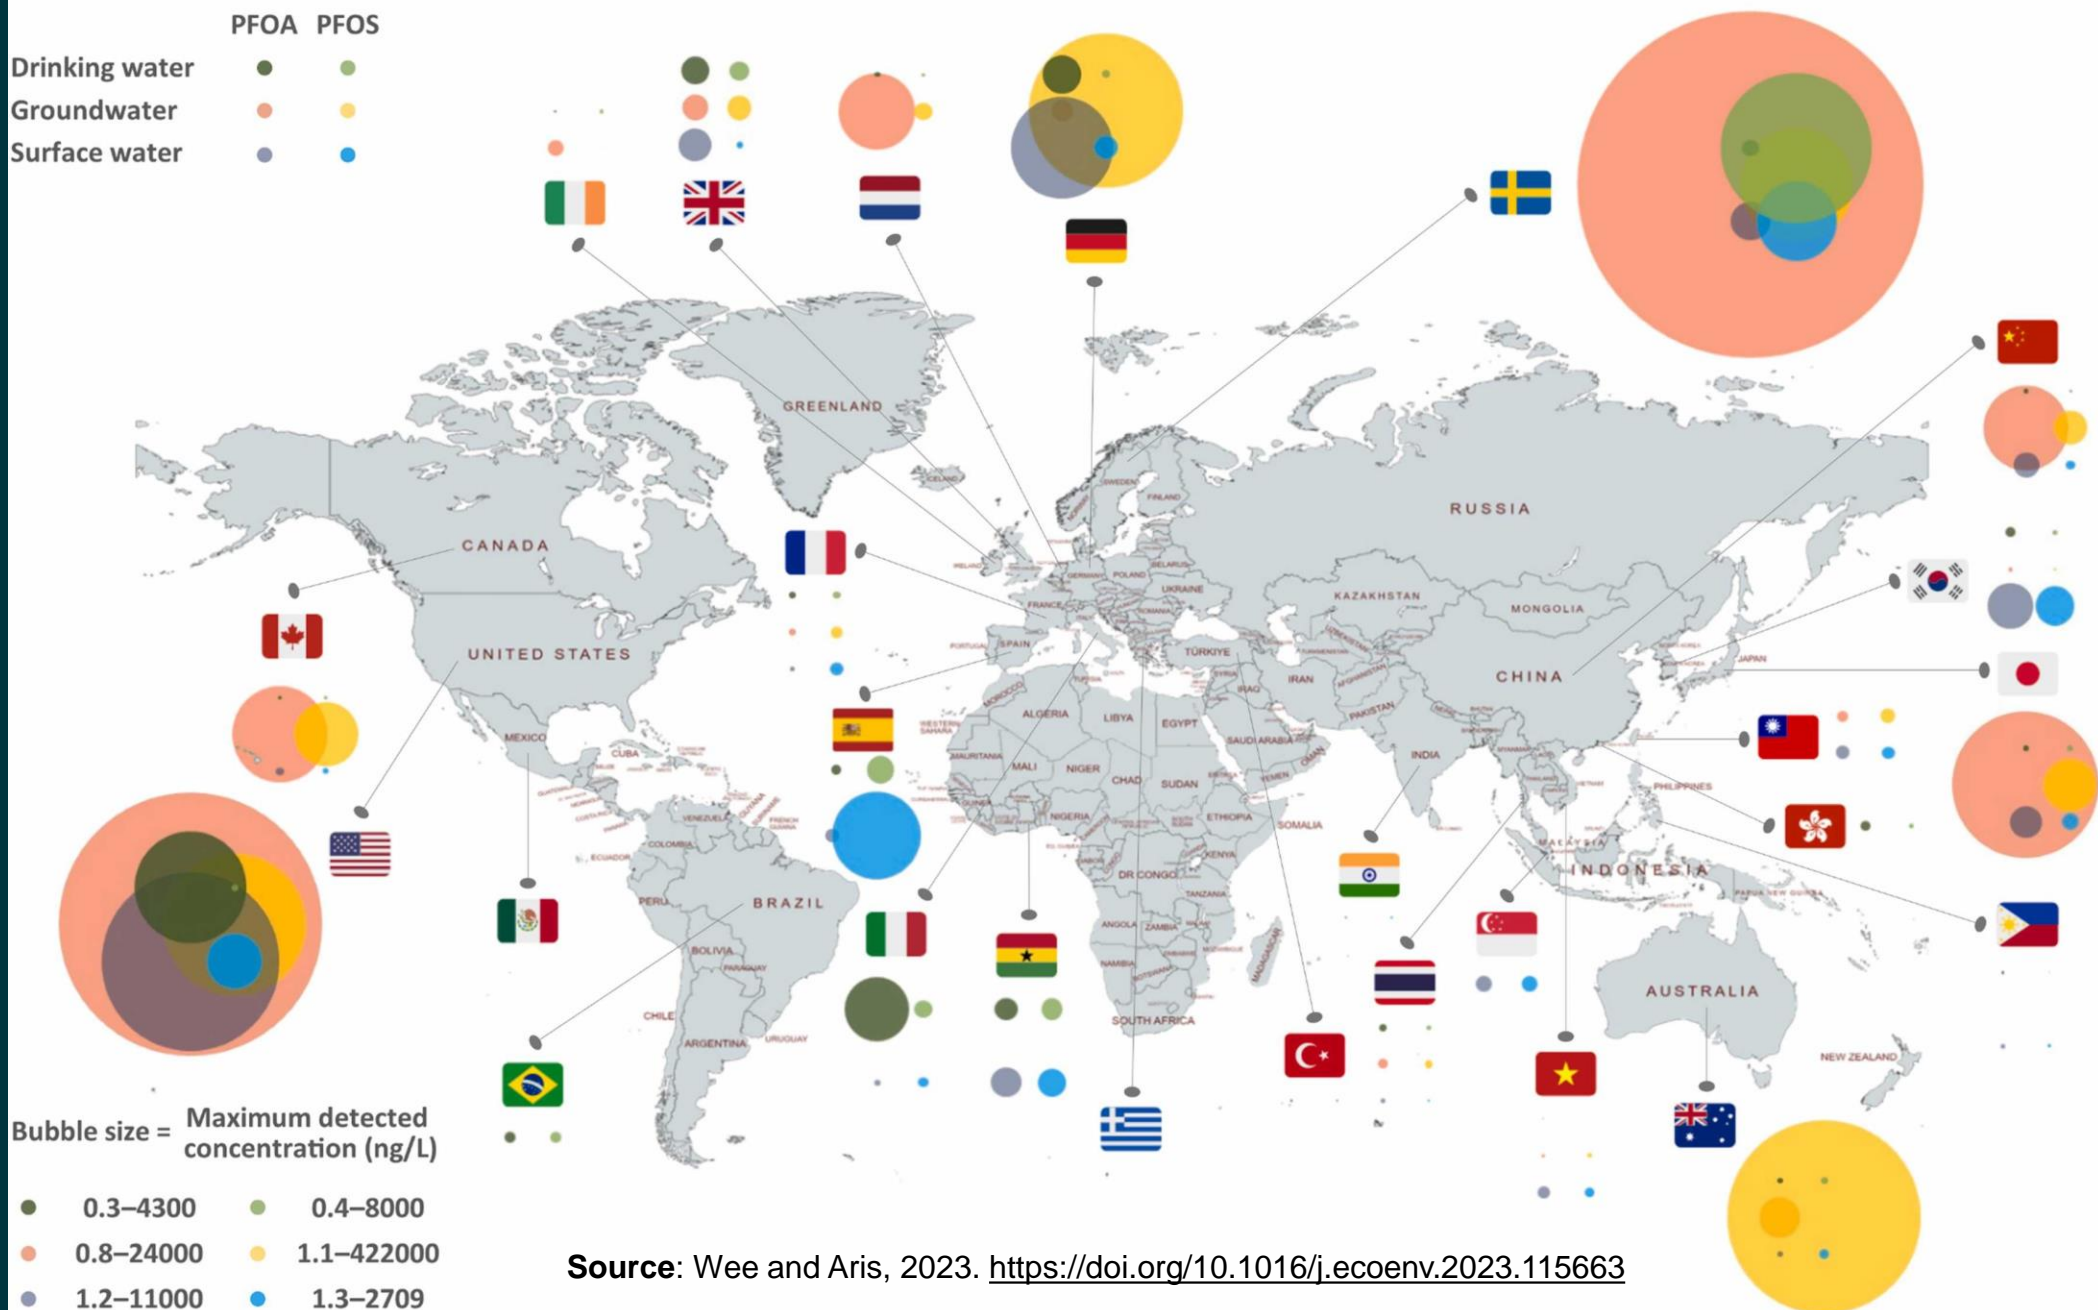

- ❖ Site-Specific Considerations
- ❖ Technology Readiness
- ❖ Treatment Trains

Achieving Remediation Solutions

IDENTIFY. RESOLVE.

PFOA and PFOS: Maximum detected concentrations in global waters

Source: Wee and Aris, 2023. <https://doi.org/10.1016/j.ecoenv.2023.115663>

Comparison of US - AUS - EU Regulatory Approaches

Regulatory Action	 US	 EU	 AUS
Overarching philosophy	Process driven regulatory response to manufacturing and environmental risks	Conservative, direct action on source reduction, focused on sustainability	Wholistic evaluation of exposures and solutions focused
Inventory & Restrictions on Importation /Manufacture/ Use	USEPA Toxic Release Inventory Toxic Substances Control Act (TSCA)	Registration, Evaluation, Authorisation & Restriction of Chemicals (REACH) Regulations	Recommendation for alternatives
Organizational Engagement	Federal/State Intergovernmental	Interjurisdictional	Federal/State Intergovernmental
Exposure-Based Approaches for: - Food Ingestion	Agency for Toxic Substances and Disease Registry (ATSDR) 2018 Tolerable Daily Intake PFOS - 20 ng/kg bw/day PFOA - 20 ng/kg bw/day	European Food Safety Authority (EFSA) 2020 Tolerable Weekly Intake PFOS, PFOA, PFHxS and PFNA 4.4 ng/kg body weight per week	Food Safety Australia and New Zealand (FSANZ) 2017 Tolerable Daily Intake PFOS+PFHxS - 20 ng/kg bw/day PFOA - 160 ng/kg bw/day
- Drinking Water	PFOS & PFOA < 4 ng/L PFNA, PFHxS, PFBS, GenX ΣHI = 1.0	Σ20PFAS > 100 ng/L	PFOS - 70 ng/L PFOA – 560 ng/L
	Individual States – compounds and criteria vary	ng/kg bw= nanogram per kilogram body weight ng/L = nanogram per liter	

Site-Specific Considerations

Nature of PFAS release

Point of compliance

Treatment objectives

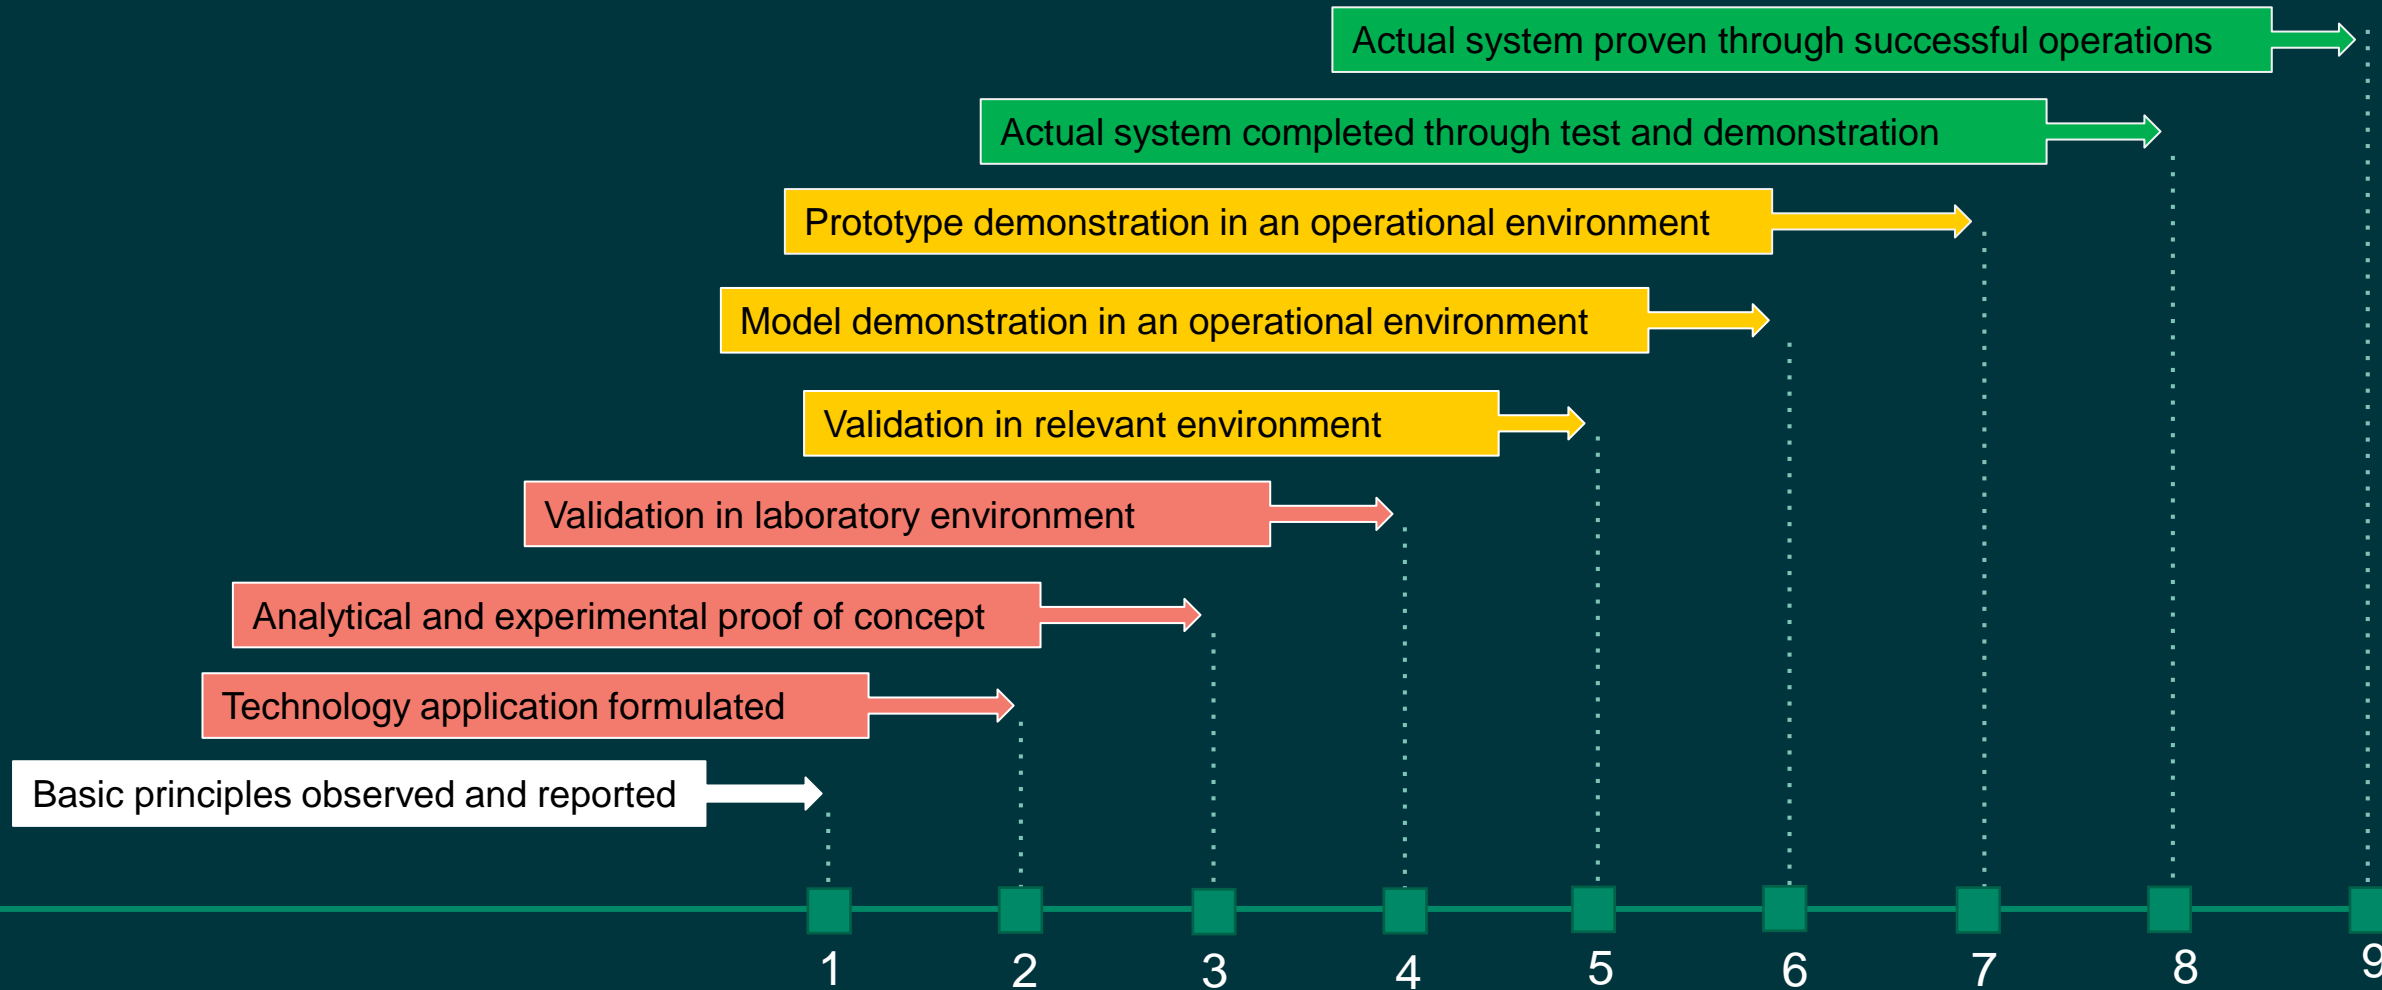

Technology considerations

- Target medium (soil, water)
- In situ or ex situ
- Commercial readiness

Engineering constraints

Technology Readiness Level Advancement

Status of PFAS Treatment Technologies

Soil/ Solid	In-Situ	Ex-situ	Mechanism	Readiness
Incineration		✓	Destruction	Commercially available
Soil Washing		✓	Separation	Field demonstrations ongoing
Ballmilling		✓	Destruction	Effectiveness being tested
Sorption and Stabilization	✓	✓	Separation	Commercially available
Thermal Desorption / Smoldering		✓	Separation	Field demonstrations ongoing
Water/ Liquid	In-Situ	Ex-situ	Mechanism	Readiness
Incineration		✓	Destruction	Commercially available
Ion Exchange (IX)/ Regenerable IX		✓	Separation	Commercially available
Reverse Osmosis/ Nanofiltration		✓	Separation	Commercially available
Foam Fractionation		✓	Separation/Concentration	Commercially available
Granular Activated Carbon		✓	Separation	Commercially available
Colloidal Activated Carbon	✓		Separation	Field demonstrations ongoing
Supercritical Water Oxidation (SCWO)		✓	Destruction	Field demonstrations ongoing
Plasma		✓	Destruction	Field demonstrations ongoing
Electrochemical Oxidation		✓	Destruction	Field demonstrations ongoing
Alkaline Hydrothermal Reaction (HALT)		✓	Destruction	Field demonstrations ongoing
Biochar	✓	✓	Separation	Effectiveness being tested
Novel Sorbents (Regenerable)		✓	Separation/Concentration	Field demonstrations ongoing
Zeolite/ Clay Mineral	✓	✓	Separation	Field demonstrations ongoing
Chemical Oxidation	✓	✓	Destruction	Effectiveness being tested
Biodegradation	✓	✓	Destruction	Effectiveness being tested
Coagulation/Flocculation		✓	Separation/Concentration	Effectiveness being tested
Sonication		✓	Destruction	Effectiveness being tested
Zero Valent Iron (ZVI)/ Doped ZVI	✓	✓	Destruction	Effectiveness being tested

Commercially available

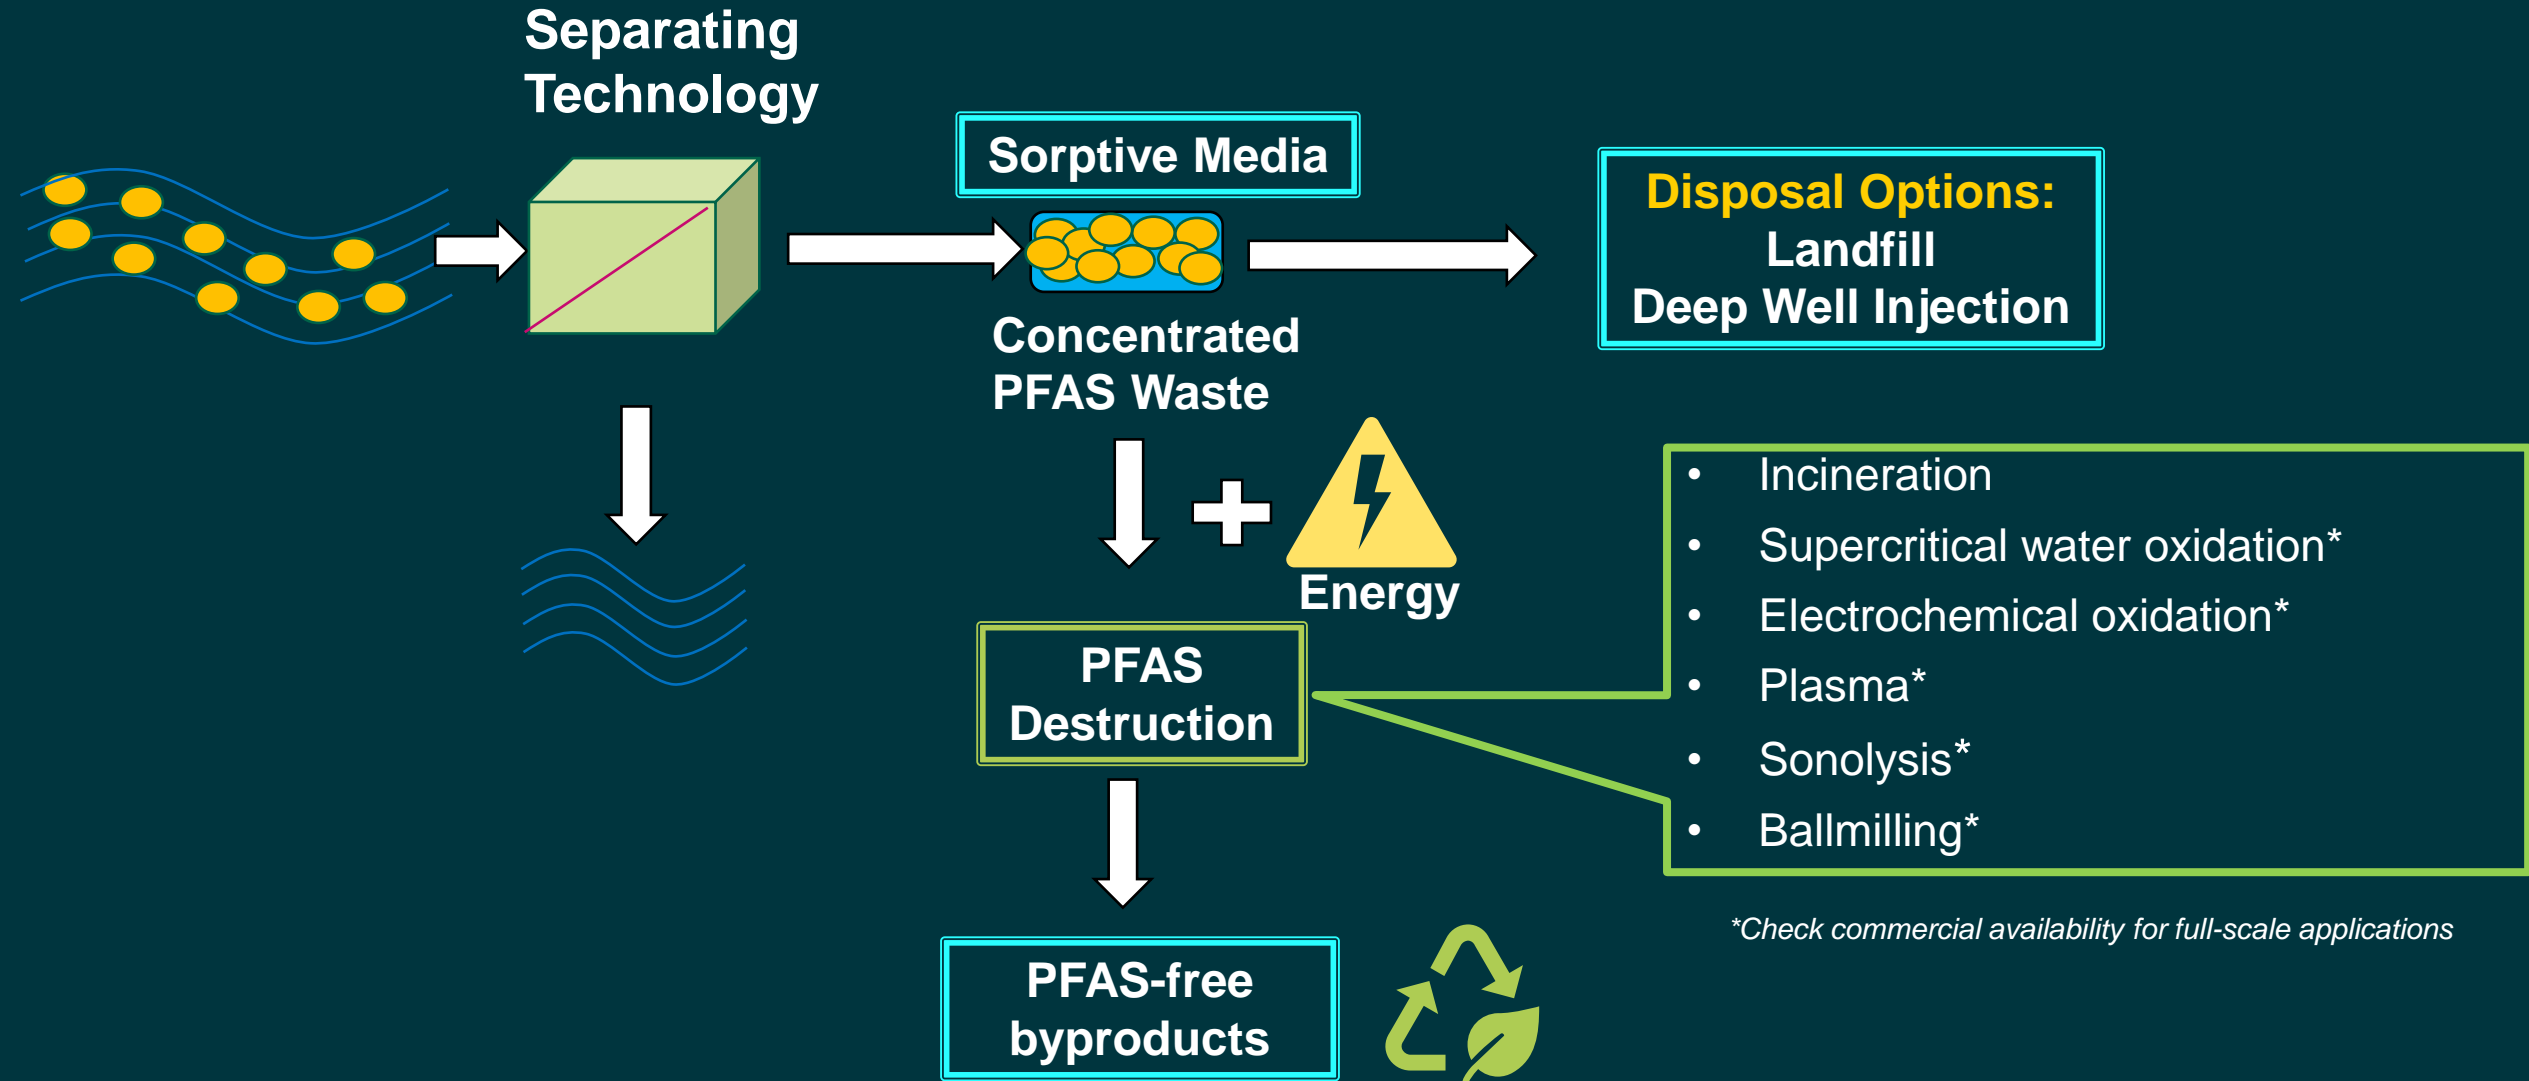

Field demonstrations ongoing

Effectiveness being tested

Adapted from Table 21-1
<https://pfas-1.itrcweb.org/>

Note:
 Short chain PFAA and precursor treatment are not yet fully evaluated

Treatment Approach – Add Destruction for PFAS-free Solution

Achieving Viable PFAS Remediation Solutions

Protect human health and the environment

Identify targeted Highly Worrying Substances

Identify appropriate treatment end goals

Research, develop and demonstrate technology
