

High-Level Dialogue on Connected and Automated Driving

18-19 June 2024, Ghent

Break-out session 1

Aligning the introduction of CAD with policy goals

Timo HOFFMANN

German Federal Highway Research Institute (BAST)
General Secretary – NAPCORE

National Access Points as key public digital infrastructure for data exchange

- ▶ **National Access Points (NAPs) have been set up in all EU Member States (and other European countries)**
- ▶ **Regulated in the EU ITS Directive & delegated regulations**
- ▶ **Goal: Facilitate access and exchange of mobility data**
- ▶ **What type of data?**
 - Data that is used in traveller information services
 - Road traffic and multimodal data, static and dynamic
 - It is mandatory to provide selected data to/at the NAP
 - E.g. Speed limits, safety related traffic information, etc.

All EU MS have a NAP

Mandatory data provision

Making data available

Useful data for services

For travellers & vehicles

The National Access Point Coordination Organisation for Europe: NAPCORE

- ▶ Data is becoming more and more important for various use cases in CAD, MaaS, traffic management etc
- ▶ ITS Directive Article 5 (3) calls for Member State coordination on various aspects regarding data exchange and provision within/across Europe
- ▶ EU-wide harmonisation of standards and processes
- ▶ NAPCORE is the only pan-European initiative of all EU Member States (and more) that works on mobility data
- ▶ National Bodies implemented as “enforcement bodies” for non-compliance ⇒ pan-EU coordination via NAPCORE

Data basis for many appl.

MS need to coordinate

All EU MS represented

Forum and work “engine”

Joint standard/process dev.

NAPCORE “Pitch”

- ▶ **Raise awareness, knowledge, status and importance of National Access Points as key public digital infrastructure for the provision and exchange of mobility data in Europe**
- ▶ **We plan to set up a sustainable long-term governance structure for NAPCORE as the tasks for European coordination on mobility data exchange continues**
- ▶ **Current success of NAPCORE due to pan-European participation of all Member States ⇒ please continue to support our work through active participation and MS-internal alignment**

NAPs are key digital infra.

MS should use potential

EU coord. is long term need

Goal: all MS on the table

Call for active participation
